Local NGO, HOPE Cape Town, received a major financial boost from its annual gala event held in Dresden, Germany recently. The HOPE Gala Dresden raised major funds which will help the organisation continue to support the communities of the Western Cape with its various programmes including feeding schemes, toy libraries, resistance testing and 25 HOPE Community Health Workers who are active in the field.

The event which was attended by more than 800 guests from Germany, Austria, Switzerland and South Africa included celebrities, politicians and was a huge success and not only raised funds but also created an international awareness of the challenges that South Africa still faces in terms of dealing with HIV/Aids and TB and the related social ills.

According to the organisations founder and Chair of HOPE Cape Town Trust, Rev Father Stefan Hippler, "We are thankful to all our supporters who make it possible to bring HOPE to so many. We still have a long way to go and there is an ever increasing need to expand our services. With the continued support of our international friends and the South African public, we are committed to making a difference in the communities we serve."

HOPE Cape Town Donor Relations Manager, Mr Fahim Docrat added, "We are very happy that our friends in Germany are continuing to support our work and have managed to raise funds which support our efforts. This would have not been possible without the hard work of our HOPE Gala Dresden Coordinator, Ms Viola Klein and her team who have been promoting our work for many years now. We look forward to an even bigger event next year."

HOPE Cape Town is located at the Medical School of the University of Stellenbosch – Tygerberg Campus and is a non-profit organization providing outreach, education and counselling at community level, focusing on HIV/AIDS and TB in the Western Cape.

HOPE Cape Town is linked to the University of Stellenbosch and cooperates with the department of Paediatrics and "KID-CRU", the Tygerberg Hospital research unit for paediatric infectious diseases. HOPE Cape Town began their work in 2001 with its mission to impact the communities they work in and have been very successful to date. Having expanded their services to address the increasing need they are now more reliant on the generosity of business and individuals to help fund their programmes.
